

This is the case when using XPLANE.

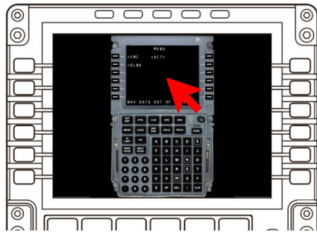

5. When you do a screen pop-up through the WEBFMC program, try it like the picture below.

PU CONNECT WITH XP

WebFMC PRO requires configuration upon first launch

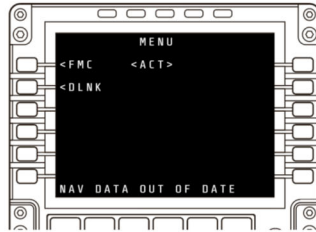

Step 1
Click the top right corner to enter the settings window.

Step 3
Double-click the screen to enter screen-only mode.

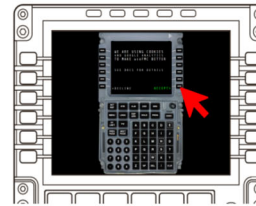

Step 2
Enable screen-only mode.

Step 4
Enjoy your flight.

PU CONNECT WITH XP

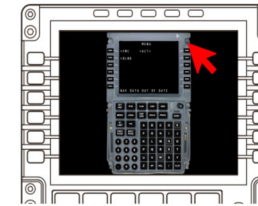

WebFMC PRO requires configuration upon first launch

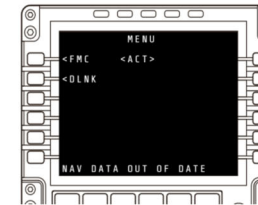

Step 1
Accept WebFMC Pro usage.

Step 4
Double-click the screen to enter screen-only mode.

Step 2
Click the top right corner to enter the settings window.

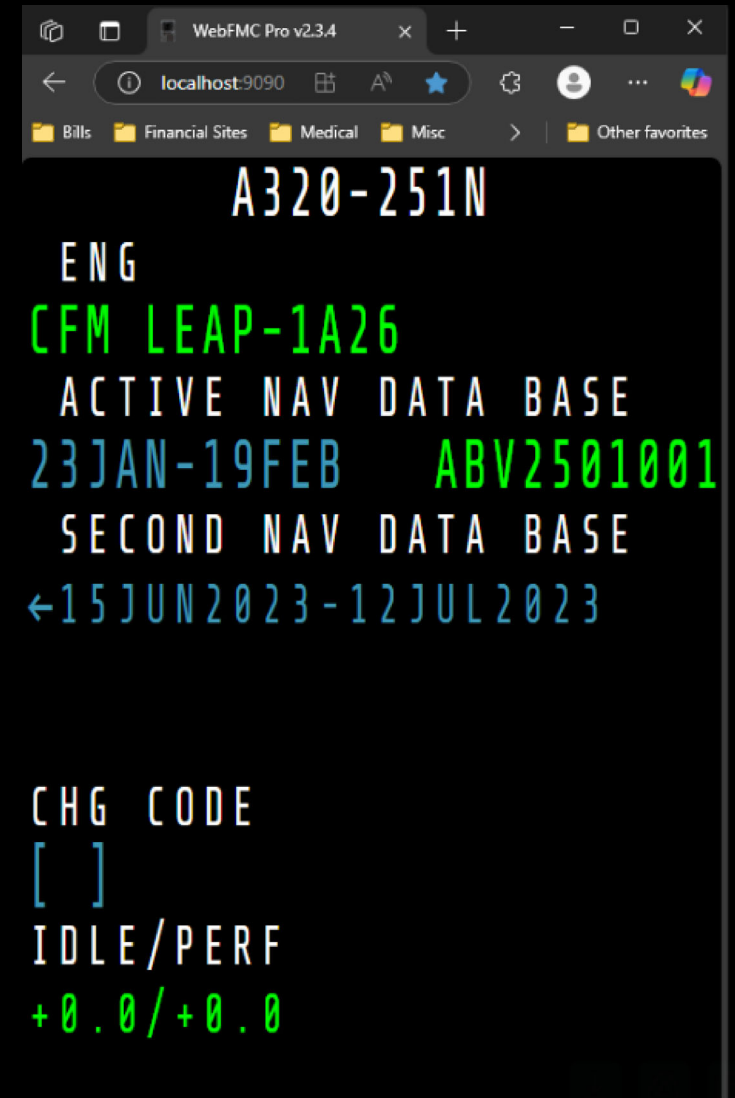

Step 5
Enjoy your flight.

Screen is not working

This is the case when using **XPLANE**

6. If the screen does not appear on the CDU after trying 5 methods, drag the browser to the CDU screen as shown in the picture and press F11 to make it a full screen.

(If you think CDU is a small monitor, it will be a little easier to understand)

Screen is not working

This is the case when using **XPLANE**

7. Please check the check box as shown in the picture and try SPA.
After checking in PU CONNECT,
the software must be re-executed to be applied.
